Yahoo Ghost! is a freeware solution developed by Ahamad Ali Khan to help Windows users to solve all their problems when using Yahoo! Messenger. You can get this software on its official website, but we can not give any guarantee on the quality or the reliability of this solution as it is freeware. Screenshots: Yahoo! Messenger remains a very popular instant messenger and although it comes with many great features, users are still bothered by the advertisement displayed in the main window and also by the fact that they can only login with one ID at a time. A quick method to get rid of ads If this is your case too, meet Yahoo Ghost!, a software solution developed to solve these problems with just a few clicks. This application automatically removes the annoying advertisements we were talking about and it also allows you to run multiple instances of the application, so that you are able to login with multiple IDs at the same time. In addition, Yahoo Ghost! comes with two more options to remember the Yahoo Messenger password and to load the instant messaging client on startup, although these two settings are also available in the tool developed by Yahoo. Bring back the original state One of the things we discovered during our test was that this program doesn't remove the ad entirely, but only the animation, so you will still be able to click on it. Looking on the bright side, you won't be bothered by animations or flashes anymore. In case you want to revert the settings to the original defaults, Yahoo Ghost! allows you to do so with only one click so you can restore the single login but be warned that you will receive back the advertisement as well. In conclusion Overall, Yahoo Ghost! is quite a handy tool if you use Yahoo Messenger on a regular basis and thanks to its great ease of use, it is well suited for all users. It really shines in those situations where more people need to stay logged in, but there is only one computer available. Yahoo Ghost! is freeware that is available for download on the site of its official author. This software has been tested professionally and we are absolutely sure that it does not contain any form of malware or a virus. Yahoo! Messenger remains a very popular instant messenger and although it comes with many great features, users are still bothered by the advertisement displayed in the main window and also by the fact that they can only login with one ID at a time. A quick method to get rid of ads If this is

Yahoo Messenger is one of the most popular instant messenger available on the market, but the annoying advertisements and the fact that you can only login with one ID at a time are still annoying for its users. Luckily, Yahoo Ghost! can solve all these problems with just a few clicks. Yahoo Ghost! Features: - Single login when having multiple IDS - Hide ads - Loads Yahoo Messenger on startup - Restore original Yahoo Instant Messenger settings - Password & account information is stored - Multiple instances can be launched Yahoo Ghost! System Requirements: All you need is a computer running on Windows 2000/XP, Mac OS X, or UNIX-based operating system (e.g. linux, Mac OS X) and working on Internet Explorer 5.5 and higher. You can download this tool from the link below for free. Yahoo! * Automatically removes the annoying advertisements we were talking about. * Run multiple instances of the application and easily log in with multiple IDs at the same time. * Password security and startup options. * Encrypts passwords and avoids data corruption. * Removes all animations from the ID screen, allowing you to click without being bothered by these animations. * Reverts all settings to their original defaults. * Runs from RAM, using very little memory. * Does not affect the performance of the system. * Runs on Windows XP, Windows Vista and Windows 7. * Free. Automatic backup & restore your photos, videos and music! Keep your files safe with a free time machine-like backup solution that will run automatically, and restore your files to their original places whenever you need. SpiderOak's Free Backup Service creates automatic backups of your files, and makes it easy to keep them safe and easy to restore. SpiderOak's Free Backup Service automatically backs up your files, encrypts them with 256-bit AES encryption, and stores them on SpiderOak's highly secure, Web-based data center. With SpiderOak's Free Backup Service, you can create a free backup "snapshot" from any folder on your computer. Then, when you need to restore any of those files or folders, all you have to do is run SpiderOak's free backup application, and it will go back to any folder on your PC, restore any files or folders from the snapshot, and then leave them in the same place where it found them. It's simple, it's safe, and it's free. SpiderOak's Free Backup Service is free for personal use. For additional storage use, the SpiderOak for Business Service is available. SpiderOak's Free Backup Service does not support folders larger than 1 GB. SpiderOak's free backup service works with file types such as: JPEG, BMP, GIF, TIFF, PDF, MP3, MPEG, MOV, DOC, XLS, DOCX, PPT, MP4, AVI, 3GP, OGG, WAV and more. The backup application is available for Windows, Mac OS X and Linux. SpiderOak's Free Backup Service Support includes: - Backup, restore, and open. - Open multiple snapshots at one time. - Restore from a previous backup. - One-time backup on SpiderOak. - One-click recovery for files and folders. - System restore
